## LEVERLESS AUTOMATIC WITH COMBI DYNAMIC TOOL

The CEMB TORUK is a super-automatic leverless tire changer engineered for cars, SUVs, and light commercial vehicles up to 30" rims. Featuring the patented Combi Dynamic Tool, TORUK delivers contact-free mounting and demounting with unmatched rim protection, speed, and operator comfort.

Designed for high-volume shops that demand productivity without compromising wheel integrity.

### KEY FEATURES

- Patented Combi Dynamic Tool
- Two-in-one axial and radial movement system
- Contact-free demounting protects rim edges
- Retractable mounting tool with integrated roller for smooth operation
- STEP-UP motion reduces bead stress and operator effort

**COMBI DYNAMIC TOOL:** Patented 'two-in-one' dynamic system Axial and radial movement for optimal efficiency Bead lever pulls bead from rim edge Retractable tool enables precise mounting without rim damage

**CONTACT-FREE MOUNTING/DEMOUNTING:** The retractable mounting tool couples with the demounting nail, providing the ideal dimension for a precise tool positioning on the rim edge. The roller, built in the tool, reduces friction and allows the smooth sliding of the bead. The nail grips the tire bead and pulls it away from the rim edge. It first lifts it and then, thanks to the exclusive TORUK STEP-UP movement, the tool rises over the rim and minimizes the stress on the bead, allowing smooth demounting.

### DIMENSIONS

Power Supply:	1.5 kW - Inverter 230V 1Ph
Max. Wheel Diameter:	1200 mm (47")
Max. Wheel Width:	380 mm (15")
Bead breaker force:	12000 N
Turntable speed:	0-16 rpm (inverter)
Operating pressure:	8-10 bar
Net weight:	370 kg (815.71 Lbs)
